

# Restoration & Preservation

Protecting history with precision, integrity, and skilled hands.

## Specializing in:

- Assements
- Restoration & Reproduction
- Conservation Planning
- Maintenance and Care

## Materials & Process:

- Lime & Gypsum based plasters
- Stuccos & Traditional Cement Plaster
- Stone work
- Moldings, Coves & Architectural Details
- Pattern & Mold Fabrication
- Architectural Castings (GFRG, GFRC, Plaster)
- Large scale interior & exterior renovations
- Concrete Restoration & Repair
- On-site installation

## Technology:

- Portable 3D Scanning
- CAD Modeling & Rendering
- CNC & Rapid Prototyping

Preserving the past,  
Protecting today,  
Building a legacy for  
the future.

## Restoration Done Right

Protecting history with precision,  
integrity, and skilled hands.

# Yesterday

## Understanding

We study old-world techniques, historic materials, and the craftsmanship that defined the original work. From lime-based plasters and ornamental castings to traditional application methods, we respect the way it was built — so your restoration feels authentic — not replicated.

# Tomorrow

## Investment in the Future

By combining traditional craftsmanship with modern technology — including 3D scanning, digital modeling, and precision fabrication — we create lasting restorations built to endure.

Our goal is not only to preserve history, but to strengthen it for generations to come.

# Today

## Taking Action

Our skilled artisans combine experience with precision to stabilize, repair, and protect historic structures before time causes further damage. Every detail matters — from careful assessment and material matching to thoughtful restoration that maintains architectural integrity.
